A Korean SME specialized in an IT security evaluation and cloud based security solutions is preparing a project proposal under EUROSTARS2. The R&D project is about further developing and designing the integrated analysis engine system and secured gateway based on edge computing which could prevent and manage cyber-attack on IoT sensors and devices in a cloud environment. R&D partner with knowledge in cloud security, machine learning, big data analysis or block chain is sought.

Deadline for EOI: 20 Aug 2019

Deadline of the Call: 12 Sep 2019

A Ukrainian scientific institute offers probiotic, also effective as a feed additive. The basis of the preparation - two spore strains of bacteria of the genus Bacillus. The biopreparation exhibits antibacterial, antifungal, antioxidant and immunomodulatory activity, improves the digestibility of feed. The institute is interested in cooperation with enterprises that specialize in the production of microbial biopreparations. The partnership is possible on the basis of license agreement.

An Italian mechatronics engineering company is developing a proposal for H2020-FTI cut-off 22-10-2019 to validate an innovative micro-cogeneration system fueled by forestry wastes having Stirling engine.

Searched partners (by 15 September)

- SME skilled in production and sale of biomass boilers
- SME / Research Center skilled in heat exchange / Stirling systems
- Commercial distributors.

Main partner sought is a SME company skilled in biomass boiler heating, that will develop the boiler system wood chipped fueled suitable to be integrated with the Stirling engine. This partner must will be able to introduce the mCHP system on the EU main markets.

Deadline for EOI: 15 Sep 2019

Deadline of the Call: 22 Oct 2019

A Spanish technological centre is preparing a project proposal for JTI-CS2-2019-CFP10-SYS-01-21: grey water container with reduced biofilm growth. The proposal will be based in the application of combined anti-stick/biocide coatings onto plastic materials which will prevent biofilm growth in plastic grey water containers. The sought partners should be large companies producing plastic containers.

Deadline for EOI: 30 Jul 2019

Deadline of the Call: 03 Sep 2019

[GERMANY](#) [RDDE20190627001](#) [Full text here](#) [Request the address](#)

A research institute of a German university is currently setting up a proposal for "Fast Track to Innovation". The envisaged project aims at reducing friction in components of medical devices (e.g. syringes) by altering the surface structure of moulded parts through surface modification directly in the mould. The research institute is looking for research partners (industry) producing rubber or plastic components for medical devices.

A French technological centre and a French R&D SME are looking for research and industrial partners (SMEs) to integrate into their consortium. They are developing a project for the September 2019 Eurostar's call, focused on developing and refining an innovative polymer-derived ceramic based material for 3D printing. The material will be more cost-efficient, and with properties comparable to the current state of art. The sought partners shall be acquainted with 3D printing and printable materials.

Deadline for EOI: 20 Aug 2019

Deadline of the Call: 12 Sep 2019
