An innovative Turkish company specialized in additive manufacturing and medical 3D printing focuses on custom made implant production for craniomaxillofacial patients. Using custom made implants creates biodegradable alternatives that can deliver benefits in a more controlled fashion at the defect site. The company is looking for partners to submit a proposal for the Eurostars programme.

Monitoring levels of fatigue is useful in health care. A Swiss SME has developed digital tools for this purpose. A consortium planning to validate these tools in a Horizon 2020 project is seeking a coordinator for research cooperation. Current consortium partners are several health care providers and a consultancy firm. The coordinator will formulate actions aimed at increasing health literacy among citizens and in advancing health professionals' proficiency in these digital services.

Slovenian group of entrepreneurs led by an investor are seeking partners for solving pollution issues resulting from single-use packaging. The project aims to enable a transition to a circular economy in water management by means of innovative products for drinkable water: a water dispenser offering refined, carbonated or still water; a bottle dispenser serving as a rent station for environmentally friendly bottles. SMEs are sought under research cooperation agreement.
