The H2020- LC-BAT-8-2020 call GreenGrid project will further develop, improve and produce highly performing innovative sodium metal batteries with cheaper materials and more environment friendly recovery technics. The consortium involves a university, public and private research centres and 4 companies. An industrial partner is required to lead the engineering and integration of battery cells into packs, for use in combination with photovoltaic panels.

Deadline for EOI: 20 Mar 2020

Deadline of the Call: 21 Apr 2020

A government-funded Korean research institute is preparing for a joint proposal under Eureka network project in 2020. The main goal of the joint research is to fabricate powder (particles) by atomic layer deposition process, which will be using precursors, with high performance and thin layers. The fabricated powder (particles) will be used for automobile and wearable device applications. To this end, the institute is looking for partners specialized in developing acoustic levitator technology.

Deadline for EOI: 01 May 2020

Deadline of the Call: 27 Feb 2021
