A Spanish public university specialised in electrical and electronic power systems is developing a project proposal to the call LC-BAT-08-2020 on next-generation batteries for stationary energy storage. The project objective is to develop new aluminium-air batteries. They are looking for companies related to the design and manufacture of battery management systems and companies involved in the manufacture of printed electronics to work together within a research cooperation agreement.

Deadline for EOI: 14 Apr 2020

Deadline of the Call: 21 Apr 2020
