БЮЛЕТИН ПРОЕКТНО КООПЕРИРАНЕ

бр. 10 / 23.07.2021

SLOVENIA **RDSI20210705001** **Full text here** **Request the address**

A coordinator of a consortium, a Slovenian research institute, has developed novel antimicrobial material based on gold. The goal of Horizon Europe project is to develop the technology for textile application and for high-traffic objects. A producer of antibacterial active component materials is sought for scaling up the production of the composite. A producer of protective textile (laboratory coats, face masks, etc.) is sought to apply the composite on its textile products.

Deadline for EOI: 30 Jul 2021

Deadline of the Call: 23 Sep 2021

GERMANY **RDDE20210715001** **Full text here** **Request the address**

A large German company active in the field of filtration systems looks for partners for a project proposal under the call - HORIZON-CL5-2021-D5-01. Aim is to assess and improve air quality at bus and metro stations by reducing exhaust, brake and noise emissions. The company searches for partners providing retrofitting solutions for the reduction of exhaust emissions of conventional engines especially for buses and/or solutions for the reduction of exhaust and brake noise.

Deadline for EOI: 27 Jul 2021

Deadline of the Call: 14 Sep 2021
