An EU consortium, led by a Spanish university, is preparing a project proposal related to the electrolysis of renewable biomass, with less electrical energy demand compared with water electrolysis, and producing value-added decarbonized chemicals in addition to pure hydrogen. The project will set up an advisory board and they are looking for companies from the sector (end-user of hydrogen, biomass supplier or chemical industry) to advice on the development of the technology.

A Portuguese biomedicine start-up company is preparing an EUROSTARS project proposal. The project is targeting a solution related to the medical application of cell therapies, particularly for autologous strategies. The company is looking for a partner to lead the automation and biosensing processes, and to work in close collaboration in the system and biological calibration, plus the cell therapy formulation. The partnership sought is a research cooperation agreement.

Deadline for EOI: 20 Oct 2021

Deadline of the Call: 04 Nov 2021
