A Croatian SME has developed a novel air measurement station that enables measuring main outdoor air pollutants without cross-sensitivities in real-time and collecting data quality information enabling open access to local communities. They are looking for a software development company to join a consortium for a Eurostars proposal with the partnership envisaged as a Research Cooperation Agreement. The call deadline is 4th November 2021; the deadline for EOIs is 24th October 2021.

Deadline for EOI: 24 Oct 2021

Deadline of the Call: 04 Nov 2021

A team of two university departments from North Italy wants to propose an easily scalable photocatalytic process for an advanced oxidation waste treatment capable of co-generating H₂ (Hydrogen) while increasing the biodegradability index for correct wastewater disposal. The two departments are preparing an EIC Pathfinder Challenges 2021 proposal and are looking for an SME (end user or co-developer) outside Italy with experience in the energy and wastewater treatment sectors..

Deadline for EOI: 22 Oct 2021

Deadline of the Call: 27 Oct 2021
